Profile

Production Capacity

We are fully integrated, from design to washing and finishing. Our annual production capacity is of 1,800,000 pieces, and the minimum order required per style is of 1,200 pieces.

Skills

Our added value on garments is our core skill : using prints, hand and machine embroideries, sublimation techniques and spray dye.

Sustainability

Karina SA limits its environmental impact. We use certified chemicals, work with certified suppliers, treat all the water from our washing department and participate financially and humanely to reforestation programs.

Employees have free access to an in-house doctor, a room dedicated to breast feeding, and have access to lunch every working day at the factory.

Ethic & Social Responsibility

We believe that businesses should impact positively society and that it is our duty to contribute to the community development.

We help by donating regularly to organizations carefully identified. Our teams regularly visit these associations and support new initiatives within the community.

Portfolio

Our team of designers are aware of the latest European trends and work closely with our clientele to produce the most fashionable collections.

Our main customers are from France, Italy Spain and South Africa.

Karina bases its success on its essential values of creativity, quality and professionalism.

Fact File
